SUMMARY

Innovative Data Scientist and Software Engineer with hands-on experience in building scalable backends, automating data pipelines, and deploying ML models using modern DevOps practices. Proven ability to design, implement, and deploy solutions that improve performance and user engagement.

SKILLS

Languages/Frameworks: Python, JavaScript, TypeScript, Django, FastAPI, React, Tailwind

Data Science/ML: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, NLP, Computer Vision

Databases: PostgreSQL, MySQL, MongoDB, SQL

DevOps: Docker, AWS, GitHub Actions, Celery, RabbitMQ, DVC

Tools: pgAdmin, Flower, Git

EXPERIENCE

Data Scientist (Contract), African Population Health and Research Centre (APHRC)

Jan 2025 - Apr 2025

- Developed a scalable backend using Django REST Framework, exposing 100% of journal models via REST APIs.
- Integrated Celery with RabbitMQ to automate 20+ recurring tasks, reducing manual intervention by 90%.
- Implemented Flower for real-time monitoring of background tasks, improving task success rate to 98%.
- Optimized PostgreSQL database with pgAdmin, supporting 50,000+ records with complex queries.
- Dockerized tech stack, reducing new developer onboarding time by 60%.

Data Scientist Intern, African Population Health and Research Centre (APHRC)

Jul 2024 - Dec 2024

- Supported Afrikajournals platform indexing 12,000+ articles and 1,000+ journals from 50+ African countries.
- Cleaned and structured 50,000+ metadata records using Python libraries.
- Trained supervised models for thematic classification, achieving 89% accuracy across 10+ domains.
- Conducted A/B tests increasing journal recommendation engagement 3x.
- Automated journal harvesting pipelines, reducing manual work by 70%.

ICT Officer Intern, Ministry of Gender, Culture, The Arts and Heritage

Jan 2023 - Feb 2024

- Connected 100+ staff computers to LAN; configured 250+ Ethernet cables.
- Installed OS, VPNs, and antivirus on 80+ machines to improve system security.
- Resolved 200+ IT issues, reducing downtime by 50%.
- Digitized 5,000+ government records with high accuracy.

PROJECTS

Afrikajournals Platform

- Django backend + React frontend platform showcasing African research journals.
- Dockerized and deployed on APHRC servers. [GitHub](https://github.com/ronnyonjetechn/AfricanJournalVisibility)

Chicken Disease Image Classifier

- Deep learning model (TensorFlow) classifies chicken feces images for Coccidiosis detection.
 - Real-time image upload and diagnosis with Flask + Docker + AWS CI/CD.
- [GitHub](https://github.com/ronnyonjetechn/chicken_disease_classifier)

Text Summarizer API

- Transformer-based text summarization using Hugging Face and PyTorch.

- FastAPI backend, Dockerized, deployed on AWS with GitHub Actions for CI/CD.

[GitHub](https://github.com/ronnyonjetechn/text_summarizer.git)

EDUCATION

Bachelor of Informatics and Computer Science

Strathmore University, 2017 - 2022
